Creating Endodontic Excellence

Presented by Clifford Ruddle, DDS, FACD, FICD

About the course:

Predictably successful endodontics is dependent on shaping canals, 3D cleaning, and filling root canal systems. Evidence-driven techniques will be presented to demonstrate each procedural step that comprises start-to-finish endodontics. Specifically, this lecture will address those factors that influence success, including endodontic anatomy, pulpal breakdown, access cavities, glide path management, working length, shaping strategies, 3D disinfection, and filling root canal systems. Dr. Ruddle will focus on the most recent advancements in clinical endodontics and how to help you achieve predictably successful results.

Dr. Clifford Ruddle:

Internationally recognized as a leading expert in all aspects of clinical endodontics, Dr. Ruddle is acclaimed for providing superb endodontic education through his teachings, clinical articles, training manuals and multimedia products. He is the founder and director of Advanced Endodontics®, an international educational source in Santa Barbara, California. Dr. Ruddle created the world's first private micro-endodontic simulation training center in 1989 and has trained several thousand dentists in microscope-assisted endodontic techniques. He is well-known for his ability to empower colleagues and motivate clinicians towards their full potential. Additionally, Dr. Ruddle maintains a private practice limited to endodontics in Santa Barbara.
